Cardinal Wyszynski	Red	Free flowering Polish introduction wit 6-8" large crimson flowers, very vigorous	2	July-September
Charmaine	Red	Rich red double, semi double and single flowers, grows to a height of 6-7 feet	2	May-June, September
Carnaby	Pink Striped	Pink with rich red bar down the middle of each petal, dark red anthers	2	June-September
Claire de Lune - NEW!	White & Lilac	A compact plant, 6-7' white flowers with pale lilac, dark anthers, prefers shade	2	June-August
Crystal Fountain - NEW!	Blue	4-5" double lilac blue flowers with a fountain like center	2	June-September
Diamantina	Blue	4-6" pom-pom like blue-purple double flowers, each flower last up to 4 weeks	2	June-August
Duchess of Edinburgh	White	Rosette shaped double white flowers with yellow anthers	2	May-June, September
Empress	Purple	Very hardy dark lavender with tints of red, 8-9" flowers	2	June & September
Ernest Markham	Magenta	Magenta-red large flower with gold anthers, vigorous grower, one of the best reds	3	July-September
Filigree - NEW!	Lavender	Silvery blue petals, ruffled edges single and doubles with dark anthers, low mounding	2	May-July
Giselle - NEW!	Pink	Star-shaped purple-pink flowers and red-purple anthers, part shade to full sun	2	May-September
Guernsey Cream - NEW!	White	Very light yellow with cream anthers, large 5-7" flowers	2	June & August
HF Young - NEW!	Blue	True mid-blue with wide petals, 7-8" flower, cream colored anthers, free flowering	2	June-July, September
Huldine - NEW!	White	Medium (4-5") white flowers with yellow anthers, vigorous, best repeat white Clematis	3	July-August
Hagley Hybrid	Pink	Medium-size rich pink 5-6" flowers with ruffly edges, attractive seed heads	3	June & September
Ines	Lavender	Compact, free flowering clematis, 4" ruffled lavender-blue flowers	3	June-September
Jackmanii Superba	Purple	Rich, velvet purple 5" open flowers	3	July-September
John Paul II	Pink	Light pink 5-6" flowers, very vigorous grower and very showy	2	May, June, September
Josephine	Pink	Flowers are almost bronze, inner petals are lilac with pink bar, pom-pom look	2	June-August
Killian Donahue - NEW!	Pink Striped	Lavender flowers with pink bars, white anthers with burgundy tips, repeat bloomer	2	June-September
Mrs. N. Thompson	Blue Striped	Flowers that are deep blue with scarlet bar	2	May-June, September
Multi Blue	Blue	Double dark blue to purple 4-5" flowers, one of the best double flowering Clematis	2	May-June, September
Nelly Moser	Pink Striped	Pale pink with red bar down middle of each petal, will grow in the semi-shade	2	June & September
Paulie - NEW!	Purple Striped	Masses of purple flowers with maroon bars and burgundy tipped anthers, compact	3	June-September
Picardy	Maroon	4" red/purple flowers with reddish brown anthers, free flowering	2	June-August
Prince Charles	Light Blue	Compact plant, profuse mauve-blue 4" semi-nodding flowers slightly twisted petals	3	July-September
Rebecca	Red	Very large flowers that are stunningly bright red and yellow anthers, free-flowering	2	May-June, August
Rosalie	Pink	Flowers take on a multitude of pink shades all blooming at the same time	2	June-September
Rouge Cardinal - NEW!	Maroon	Large deep velvety crimson flower with red anthers	3	June-September
Sally - NEW!	Pink Striped	Light pink with a deep pink stripe, light brown anthers, repeat flowering plant, 5' growth	3	June-September
Samaritan Jo	Silver & Purple	Pointed silvery petals edged in purple, purple anthers with cream tips, 4-5' growth	2	June-September
Sarah Elizabeth - NEW!	Pink	Glowing pink slightly ruffled flowers, tolerates shade to part shade	3	June-September
Silver Moon - NEW!	Light Blue	6-7" silvery mauve flowers, creamy-white anthers, shade to part shade grower	2	June-August
Stand By Me - NEW!	Blue	Non-vining, bell-shaped blue flowers, benefits from support, some late rebloom	3	May-June
Sweet Summer Love	Purple	Star-like multi-colored purple blooms, earlier and longer blooming than Sweet Autumn	3	August-September
Sweet Autumn (Paniculata)	White	Vigorous grower, clusters of small, very fragrant, white flowers	3	August-September
Texensis Princess Diana	Pink	Miniature tulip-like flowers are 2" long, pink outside with a deep pink central bar	3	June-July, September
The Countess of Wessex	White	White flowers with purple anthers, free flowering compact clematis, part shade	3	May-June & August-September
Viticella Venosa Violacea	White & Purple	4-5" flowers of white with purple veins, purple edges, will grow in semi-shade	3	July-September
Warsaw Nike	Maroon	Reddish purple 5" flowers	2	May-September

Clematis Culture

The best time to plant clematis is Spring, Summer or early Fall in a location of 5-6 hours of sunlight.

Clematis roots are long and run deep and like it cool and damp, but not soggy. A good idea is to plant annuals around the base of the clematis, plant a low growing shrub to shade the roots, or mulch the ground around the base of the clematis plant to help keep the soil and roots cool. Loosen the soil to a depth of 2 feet. Mix this soil with peat and sand. Carefully set your clematis plant in the hole so the crown is 1 inch below the soil level when the plant was in the pot.

Stake the plant and if possible wrap a piece of screen loosely around this to prevent animals from breaking or eating off the stem for the first year. The stake should be placed towards the trellis to train the plant to its permanent support.

Keep your clematis well watered, do not let it dry out. In years to come always soak once a week in dry weather. Feed twice a year with a balanced granular fertilizer, or a good water soluble fertilizer.

Prune your clematis the first Spring after planting, back to 10-12". This is very important to get your plant off to low branching and heavier flowering over the whole clematis vine.

Apply a mulch around the base of your clematis through the winter dormant months. With proper care your clematis plant will give you much enjoyment for many years!

Pruning Techniques

1. This group of clematis produce their flowers directly from old stems and, therefore, pruning must not be done until right after all flowering has been completed. Prune this group by removing all dead and weak stems immediately after flowering. Large established plants over 15 feet are normally not pruned, especially if they are growing in trees. All stems at this time should be tied into position on their trellis or other host. Also, if the Clematis has outgrown their space the correct and only time to prune to size is right after flowering is done. After pruning new growth will begin, this being the stems for next year's flowers.

2. In this group all first flowering comes from last season's ripened stems. In early Spring watch for swelling leaf buds beginning to show. Cut all dead material off above these swelling buds. Be sure all growth is tied to trellis at this time. Do not tie too tightly, so growth can begin and not hampered by tying too tight or cracking these stems.

3. This group blooms later and from new growth. This group should be pruned in February or March as new leaf buds begin to show low on the plant. All dead material above these buds should be removed at this time. Clean out any old foliage or foliage with mildew at this time also.
